Hi Chris,

The results are expected back late today. We are trying to get them sooner so we may transmit to you. I'll keep you posted.

Mike

Marty and Mike-

Tomorrow (10/8) is the last day I will be in the office for the next week and a half. I may be available by phone on Thursday, but I have to attend to some family matters the following week.

Is there any way you can get me the Building B sub-slab data and concrete re-use plan by the end of the day tomorrow?

Thanks.

Hi Chris,

The northeastern corner excavation will be completed within the next several days. The excavation

to the east of building J was dug on Saturday and confirmation sampling is being performed today. Provided the results are favorable, that excavation will be closed this week.

The area south of Building J is currently being prepped for excavation and will be excavated this week.

We are still awaiting the results of the additional underslab floor samples from Building B. Once we have those results we will forward them to you and revise our concrete re-use plan accordingly. Demolition of Building B is planned to begin before the end of the week.

Later this week you will be receiving the confirmation samples for the northeastern corner, east of Building J and, Underslab Building B samples and possibly the data from the South of Building J excavation. We'll keep you posted on anything unusual that we find.

Thanks,

Mike Stephenson

Hi-

I just wanted to check on the progress at the site, and see what activities are projected for this week.
